

# LIFE-C PROMOTING LIFE CYCLE THINKING IN HIGHER EDUCATION

## WE'RE COMING TO AN END BUT IT'S NOT OVER! WHERE CAN YOU FIND US?

The LIFE-C project has come to an end, achieving all of its assumed goals and deliverables, and unfortunately (despite how much we'd like to continue!), the project is coming to an end on 31/08/2025. But don't worry, the Consortium plans to stay together, even after the end of the LIFE-C and look out to our incoming updates! Look forward to our project summary (next Newsletter!), and here we present some of our sneak-peak of the results available on the Erasmus+ Results Platform.

### Validated LCA Courses with a complete set of training materials

Students, teachers and life-long learners are provided with

- ▶ a modular course on LCT, LCA, S-LCA and LCC
- ▶ complete set of materials to teach and learn essential skills to apply LCA across various scenarios
- ▶ techniques to interpret and analyse LCA results in terms of environmental impacts
- ▶ means to learn the value and practical usefulness of LCA in decision-making
- ▶ the ability to critically assess LCA outcomes and propose sustainability improvements for products and services

### Final and validated E-learning platform

The official LIFE-C e-learning platform is available at <https://multiasm.eu/mooc/login/index.php>

- ▶ login and join us to learn LCA with the LIFE-C
- ▶ gain a free full access to the teaching materials and innovative exercises
- ▶ interpret and analyse full LCA results, learn how to perform the LCA
- ▶ critically assess outcomes, identify opportunities to reduce environmental impacts, and recommend sustainability improvements

### Course Handbook

The main goal of this Handbook is to provide help and support for teachers and educators to deliver the LIFE-C courses about life cycle thinking and life cycle sustainability assessment at the interested higher education institutions (HEI) and schools. The LIFE-C Course Handbook answers the core questions: **How can I use LIFE-C results and deliverables? How can we deliver the course at our HEI?** and additionally bring the teaching action plan showing how the course was built (and how you can create yours!), LIFE-C Coaching methodology, and latest pedagogical guidelines applied in innovative and inclusive teaching.

All of the LIFE-C Materials will be available after 31/08/2025 on the Erasmus+ Results Platform at: <https://erasmus-plus.ec.europa.eu/projects/search/details/2022-1-PL01-KA220-HED-000085853>

# LIFE-C PROMOTING LIFE CYCLE THINKING IN HIGHER EDUCATION

## Follow up and sustainability plan

LIFE-C mission on "*Promoting life cycle thinking in higher education*" continues!

Starting from the National Webinars and Final Webinar the LIFE-C Team already presented the main goals and assumption of the Follow up and sustainability plan, that describes actions and the plan the mission of promoting life cycle thinking in higher education and sustainability of the developed project results after the project duration. How do we plan to keep the LIFE-C project mission alive?

- By implementing the LIFE-C courses in Partners and any interested HEIs.
- By organizing Webinars, Seminars and Summer Schools within the LIFE-C group for all interested students and educators in life cycle thinking and life cycle assessment.
- By maintaining and taking care of the project results, *i.e.*, the website, e-learning platform and teaching materials.
- We are looking forward to your feedback and contact via the website or directly at the coordinator - [szymon.sobek@polsl.pl](mailto:szymon.sobek@polsl.pl)

## LIFE-C Final Webinar

**LIFE-C**  
Promoting life cycle thinking in higher education

Final International Webinar of the Erasmus+ project, Promoting life cycle thinking in higher education, LIFE-C

Zoom Meetings, Online webinar

Save the date! **Thursday, 10.07.2025 14:00-16:00 (CEST)**

LIFE-C project aims to prepare students and professionals across all activity sectors to become true agents of change, by providing them with knowledge and tools to address their future choices and decisions, increasing environmental impacts.

The aim of the project is to develop and implement a modular LCA, UCC/LCA course for students to introduce, train and master your skills on environmental and social impact assessment for future challenges of modern industry and society.

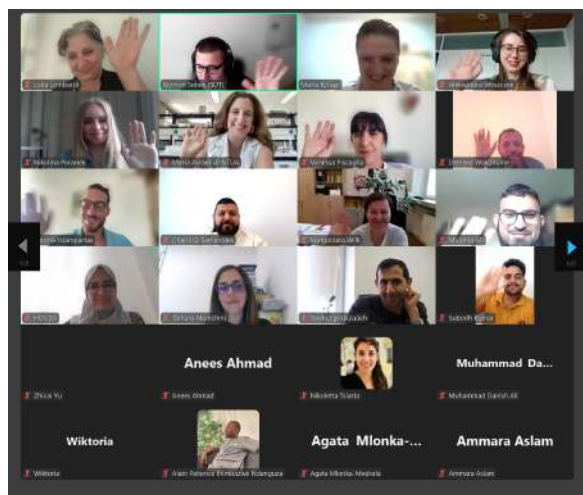

During the Final Webinar, the partners will present the final version of the e-learning course, along with the Official e-learning Platform and the Course Handbook, taking into consideration the evaluation collected during the pilot tests and the last steps of the project expansion strategy.

**The LIFE-C speakers are:**

- LIFE-C Lead Partners - LIFE-C and Life Cycle Sustainability Assessment at Universities
- Zeynep Sobek (SLT) Project Coordinator - Presentation of LIFE-C project deliverables
- Aleksandra Winiarska (SLT) - Carbon footprint of a university
- Maria Kuroki (SLT) - A life cycle cost perspective for innovative waste and wastewater systems designed by NPL
- Anoushka Khan (SLT) - Circular Economy pathway for energy transition, Circular Energy

Join us on-site or online! The link for the meeting is [here!](#)

As we've already mentioned during our Final Webinar, we would like to thank All of You who have been with us for those 3 amazing years. Well above the assumed 120 students trained, hours of seminars, meetings, presentations, coaching and webinars and tons of satisfaction and happy memories.

*The project came to an end, and I couldn't even dream of a better final outcome, the results are truly of the highest quality. As for working in this Team, I'd like to start over again to ensure this collaboration continues. Unfortunately, with the LIFE-C, that's no longer possible, but I'm looking forward to future projects with this same Team! Thank you!*

~Szymon Sobek, LIFE-C Project Coordinator
